

Altos BrainSphere™ R365 F4

BrainSphere™ R365 F4, equipped dual AMD EPYC™ 7002 and 7001 series processors, is a robust two-socket 1U system that is ideal for almost any type of applications. This dynamic and balanced system can function as a database server for Big Data Analytics, a computing node for your HPC (High-Performance Computing) environments, or used for virtualization purposes in your cloud infrastructure. Extremely powerful and highly efficient, this system functions as the core for your most demanding data-center needs.

Rich Computing Power

Powered by AMD EPYC™ 7002 and 7001 series processor, with 64 cores and 8 channels of memory per socket, the AMD EPYC™ processor strikes the perfect balance of threads/cores, memory, and raw IO, to deliver most optimized performance and support most demanding workloads.

Excellent Expandability

In addition, Altos BrainSphere™ R365 F4 provides 32 of DDR4-2666 DIMM slots, 3 PCIe slots, and a total of ten 2.5” drive bays, to perfectly fulfill demands of high-capacity memory and storage.

Robust Availability

BrainSphere™ R365 F4 has dual 1,200W PSU, 80 PLUS Platinum, to support 1+1 redundancy.

Accelerate AI development

With Altos BrainSphere™ AI Development Platform API service agent, it integrates system, GPU and AI Deep Learning container management to fast build and deploy AI development environments.

About Altos

Altos Computing Inc. (abbr. Altos) is established in 2017 and it is a subsidiary of Acer Inc. The business model of Altos is to provide the best streamlined and cost-effective integrated solutions thru in-house R&D working with ODM/IHV/ISV on servers, workstations, thin client, network and storage. In the era of demanding speed, Altos provides leading solution included, but not limited to High Performance Computing, Virtual Desktop Infrastructure, Cloud Infrastructure and Software Defined Storage, etc.

Altos provides solutions and services to government, academia, cloud service providers, datacenter operators and enterprises.
